Letter from the CEO

Dr. Amara Okafor, Chief Executive Officer

Dear readers,

2025 was a year of growth and of decisions. Our wind, solar and storage assets generated 2,860 GWh of clean electricity – enough for around 790,000 households – and avoided **1.2 million tonnes of CO₂**. Revenue grew by 13 % to **EUR 312 m**, EBITDA by 17 % to **EUR 148 m**. These are the best results in the fifteen-year history of Weyland.

Behind these numbers are 450 people in Hamburg, Edinburgh and Copenhagen and many more at our partners. Kestrel Ridge, our 75.6 MW wind farm in the Scottish Borders, completed its first full calendar year with an availability of 97.4 %. Our technicians climbed thousands of metres of tower ladders, our engineers prepared one of the largest offshore wind projects in the North Sea and our finance team put together a financing package that would have seemed out of reach only a few years ago.

Harrow Bay – the biggest step in our history

On 12 February 2026 the Supervisory Board approved the final investment decision for Harrow Bay Offshore Wind. With 480 MW, 40 turbines and an investment of EUR 1.62 bn, Harrow Bay is bigger than everything Weyland has built before. Five banks led by Hanseatic Infrastructure Bank provide EUR 1.1 bn of project finance. From 2028, Harrow Bay will supply clean power to the equivalent of 520,000 homes.

A new strategy: Clean power, built to last

When I took over as CEO on 1 October 2025, I asked our teams and our board one question: how do we double the size of Weyland without losing what makes us good? The answer is our Strategy 2030. By 2030 we want to operate 2.5 GW of renewable capacity and generate revenue of around EUR 600 m from a pipeline that today comprises 4.2 GW of offshore wind, solar, onshore wind, storage and green hydrogen projects.

Growth is not an end in itself. Our promise – *clean power, built to last* – means assets that perform for decades, partnerships with communities that are built on trust, and a workplace where everyone goes home safe. Our total recordable injury rate fell to 2.1 per million hours worked; our goal is to be below 2.0 by 2028.

Thank you

I would like to thank Dr. Henrik Vogt, who led Weyland for nine years and handed over a company in excellent shape. I thank our shareholders and the Supervisory Board for their trust, our partners for their commitment and, above all, our employees for their work every single day.

Hamburg, March 2026

Dr. Amara Okafor

Chief Executive Officer

Weyland at a glance

	2025	2024
Operating capacity	1.1 GW	1.03 GW
Generation	2,860 GWh	2,664 GWh
Revenue	EUR 312 m	EUR 276 m
EBITDA	EUR 148 m	EUR 126 m
CO ₂ avoided	1.2 Mt	1.08 Mt
Employees	450	418
Pipeline	4.2 GW	3.6 GW

Weyland Energy develops, builds and operates wind, solar and storage assets in Germany, the United Kingdom and Denmark. Founded in Hamburg in 2011, we have offices in Hamburg, Edinburgh and Copenhagen.

Generation by technology 2024 and 2025

Milestones 2025

- 2 April – Annual Report 2024 published
- 30 June – turbine supply agreement with Halden Turbine Systems for Harrow Bay
- 1 October – Dr. Amara Okafor becomes CEO
- 18 November – Millbrook land lease signed
- December – Harrow Bay term sheet agreed with Hanseatic Infrastructure Bank

Revenue and EBITDA 2021–2025

Strategy 2030

On 19 March 2026 the Supervisory Board approved our Strategy 2030 "Clean power, built to last". It sets three growth pillars – offshore wind, solar and storage, flexibility and hydrogen – and five enablers: safety, people, digital, communities and simplicity.

Target	2025	2030
Operating capacity	1.1 GW	2.5 GW
Revenue	EUR 312 m	EUR 600 m
EBITDA margin	47 %	≥ 45 %
CO ₂ avoided per year	1.2 Mt	2.6 Mt

Pipeline of 4.2 GW

Technology	GW
Offshore wind	2.1
Solar PV	0.9
Onshore wind and repowering	0.6
Battery storage	0.5
Green hydrogen and flexibility	0.1
Total	4.2

The pipeline will be funded by project finance, operating cash flow and the sale of minority stakes in operating assets (capital recycling).

Operations review

Fleet performance

The operating portfolio of 1.1 GW generated 2,860 GWh in 2025 (2024: 2,664 GWh). Wind resources were close to the long-term average; solar irradiation was 3 % above average.

Asset group	GWh 2025	GWh 2024
Offshore wind (legacy minority stakes)	1,045	1,012
Onshore wind Germany	812	798
Onshore wind UK (incl. Kestrel Ridge)	618	512
Solar PV	296	281
Battery storage (net discharged)	89	61

Kestrel Ridge Wind Farm

Kestrel Ridge (18 × 4.2 MW, 75.6 MW) completed its first full calendar year of operation. Availability reached 97.4 % (target 97.0 %), the capacity factor 31.2 % and generation 206.6 GWh. Highline Wind Services, our O&M contractor, achieved the availability bonus for three of four quarters.

Kestrel Ridge Wind Farm, Scottish Borders

Maintenance and safety

More than 1,900 maintenance visits were carried out across the fleet. The total recordable injury rate fell to 2.1 per million hours worked (2024: 2.4).

Projects and pipeline

Harrow Bay Offshore Wind (480 MW)

In 2025 we signed the turbine supply agreement with Halden Turbine Systems (30 June) and the contracts for foundations, cables and the installation vessel MV Sea Atlas. The final investment decision followed on 12 February 2026. Offshore construction starts in April 2026; commercial operation is planned for June 2028.

Monopile fabrication for Harrow Bay at Rhenus Steelworks

Millbrook Solar & Storage (85 MWp)

The land lease for 142 hectares north of Millbrook was signed on 18 November 2025. Public consultation starts in March 2026, the planning application is planned for mid-2026.

Further pipeline

- Fenwick Battery Storage (100 MW / 200 MWh) – site secured in principle
- Green Hydrogen Pilot (5 MW) – feasibility study with an industrial partner
- Two North Sea follow-on sites for offshore wind (≈ 1.6 GW)

Sustainability

Sustainability is not a separate chapter of our business – it is our business. In 2025 our assets avoided 1.2 million tonnes of CO₂.

Nature

Marlow Ecology carried out 46 seabird and marine mammal survey days for Harrow Bay in 2025. The results informed our piling noise mitigation plan with double bubble curtains and seasonal restrictions.

Seabird survey in the Harrow Bay area

People

We welcomed 52 new colleagues; the workforce grew to 450 employees from 31 nations. Women hold 31 % of leadership positions (2024: 27 %).

Technicians at Kestrel Ridge

Communities

Our community benefit funds paid EUR 745,000 to 63 local projects – from a new roof for the village hall near Kestrel Ridge to school science kits in Dithmarschen.

Our team in Hamburg

Risk report

Weyland's risk management system covers all subsidiaries and projects. Risks are assessed quarterly by likelihood and impact and reported to the Executive Board and the Supervisory Board.

Risk	Assessment	Mitigation
Construction risk Harrow Bay	High	Fixed-price contracts, contingency, experienced project team
Power price risk	Medium	PPAs, CfDs, hedging; max. 30 % merchant exposure from 2028
Wind and solar resource	Medium	Geographic diversification; P90 liquidity planning
Interest rate risk	Low	85 % of Harrow Bay debt hedged
Cyber security	Medium	ISO 27001 programme, OT segmentation
Regulatory and permitting	Medium	Early stakeholder engagement, three consultations per project

No risks were identified that could jeopardise the continued existence of the group.

Corporate governance

Weyland Energy GmbH has a two-tier board structure. The Executive Board manages the company; the Supervisory Board advises and supervises it.

Executive Board	Function
Dr. Amara Okafor	CEO (since 1 October 2025)
Jonas Richter	CFO
Paul Wagner	COO (since 1 October 2025)
Dr. Henrik Vogt	CEO until 30 September 2025

Supervisory Board	Function
Dr. Karin Albrecht	Chair
Michael Sørensen	Deputy Chair
Prof. Dr. Ulrike Brandes	Chair of the Audit Committee
Gareth Hughes	Member
Silke Hamann	Employee representative

The Supervisory Board met four times in 2025 and held a strategy day in January 2026. Attendance was 100 %.

Financial review

Results of operations

Group revenue increased by 13 % to EUR 312 m (2024: EUR 276 m). Growth was driven by the first full year of Kestrel Ridge, higher volumes from the battery fleet and a full year of indexed CfD prices. EBITDA rose to EUR 148 m (2024: EUR 126 m), corresponding to a margin of 47.4 %.

EUR m	2024	2025
Revenue	276.0	312.0
Other operating income	5.0	6.0
Cost of materials and O&M services	-56.0	-61.0
Personnel expenses	-52.0	-58.0
Other operating expenses	-47.0	-51.0
EBITDA	126.0	148.0
Depreciation and amortisation	-80.0	-84.0
EBIT	46.0	64.0
Net finance costs	-27.0	-29.0
Earnings before tax	19.0	35.0
Income taxes	-5.0	-10.0
Net income	14.0	25.0

Revenue by stream

EUR m	2024	2025
Electricity sales (merchant and PPA)	214.0	241.0
Contracts for difference / feed-in support	34.0	38.0
Guarantees of origin and REGOs	14.0	17.0
Asset management and O&M services for third parties	9.0	11.0
Other revenue	5.0	5.0

Financial position

Total assets increased to EUR 2,470 m (2024: EUR 2,115 m), mainly due to assets under construction for Harrow Bay (EUR 610 m, 2024: EUR 318 m). Equity rose to EUR 820 m following capital increases of EUR 210 m; the equity ratio was 33.2 %. Net debt was EUR 1,104 m.

Cash flows

EUR m	2024	2025
-------	------	------

EBITDA	126.0	148.0
Change in working capital	-4.0	-3.0
Income taxes paid	-6.0	-8.0
Other non-cash items	-3.0	-6.0
Cash flow from operating activities	113.0	131.0
Capital expenditure (incl. Harrow Bay pre-FID)	-248.0	-398.0
Development spend and other investments	-18.0	-14.0
Cash flow from investing activities	-266.0	-412.0
Equity contribution from shareholders	0.0	210.0
Drawdown / (repayment) of borrowings, net	151.0	120.0
Interest paid	-26.0	-28.0
Dividends and other	0.0	-4.0
Cash flow from financing activities	125.0	298.0
Net change in cash	-28.0	17.0
Cash at 1 January	197.0	169.0
Cash at 31 December	169.0	186.0

Subsequent events

On 14 January 2026 turbine T-07 at Kestrel Ridge suffered a gearbox bearing failure (KR-INC-2026-003); the gearbox was exchanged under warranty. On 12 February 2026 the final investment decision for Harrow Bay was taken and financial close on EUR 1.1 bn of senior debt was reached; shareholders subscribed a further capital increase of EUR 140 m.

Outlook 2026

For 2026 we expect revenue between EUR 330 m and EUR 338 m and EBITDA between EUR 150 m and EUR 158 m, assuming average wind and solar resources. Capital expenditure will rise to around EUR 640 m, mainly for Harrow Bay.
