

Community Benefit Policy

Group policy – approved by the executive board 20 October 2025

Tom Berger · 20 October 2025 · WE-POL-CE-002

1. Scope

This policy applies to every onshore and offshore generation and storage project developed or operated by Weyland Energy in the UK, Germany and Denmark.

2. Commitments

- Onshore wind: 5,000 per installed MW per year (GBP in the UK, EUR elsewhere), index-linked.
- Solar and storage: at least EUR 1,000 per MWp per year, index-linked.
- Offshore wind: a coastal community fund agreed with the host local authority.
- Funds run for the full operational life of the asset.
- At least 15 % of each fund is reserved for household energy-efficiency measures.

3. Governance

Funds are managed by an independent administrator. Decisions are taken by a local panel with a majority of residents. Weyland holds one seat and no veto, except for legal and reputational red lines (e.g. no political campaigning).

4. Transparency

All grants are published annually with recipient, amount and purpose.

5. Current funds

Fund	Annual amount	Since
Kestrel Ridge Community Benefit Fund	GBP 378,000	2024
Harrow Bay Coastal Fund	GBP 250,000	from construction start 2026
Millbrook Community Fund (planned)	EUR 120,000	first full year of operation
