hse-ppe-layout

Flat lay of wind industry personal protective equipment on a grey concrete floor: white helmet with chin strap, full-body harness, twin lanyard, safety boots, gloves, safety glasses, ear defenders and a personal locator beacon.

At Weyland Energy we build and operate clean energy assets across Northern Europe. We will only do this in a way that brings everyone home safe and healthy, every day, and that protects the places where we work. Our tagline is *Clean power, built to last* – that applies to our people and our environment as much as to our assets.

Our commitments

- Provide safe and healthy working conditions and prevent work-related injury and ill health for our employees, contractors and visitors.
- Eliminate hazards and reduce HSE risks using the hierarchy of controls.
- Protect the environment, prevent pollution and protect biodiversity – on land and at sea, including seabirds and marine mammals.
- Fulfil all legal and other requirements in the UK, Germany and Denmark and the conditions of our consents and permits.
- Consult workers and their representatives and encourage everyone to report hazards, near misses and ideas without fear of blame.
- Give every person the right and the duty to stop work they believe is unsafe.
- Select contractors with strong HSE performance and manage them actively.
- Continually improve our HSE management system, certified to ISO 45001 and ISO 14001.

Our goals

Zero fatalities and life-changing injuries. A lost time injury frequency rate (LTIFR) below 1.0 per million hours. Zero significant environmental incidents. 1.2 million tonnes of CO₂ avoided in 2025 – and more every year.

Responsibilities

The Executive Board is accountable for this policy. Managers lead by example and make sure their teams have the training, equipment and time to work safely. Every employee and contractor is responsible for their own safety and that of the people around them. The HSE Manager reviews this policy every year.

Hamburg, 20 January 2026

Dr. Amara Okafor	Hannah Weber
Chief Executive Officer	HSE Manager
