

Weyland reaches financial close for 480 MW Harrow Bay Offshore Wind

EUR 1.1 bn project finance led by Hanseatic Infrastructure Bank

Noah Fischer · 12 February 2026

Hamburg, 12 February 2026 – Weyland Energy today took the final investment decision for the 480 MW Harrow Bay Offshore Wind farm and reached financial close on EUR 1.1 bn of senior debt. Total investment is EUR 1.62 bn. Hanseatic Infrastructure Bank acted as mandated lead arranger for a group of five lenders.

Construction starts in April 2026 with the installation of the first of 40 monopiles from the jack-up vessel MV Sea Atlas. First power is expected in September 2027, commercial operation in June 2028.

"Today is the biggest day in Weyland's history," said Dr. Amara Okafor, CEO. "Harrow Bay will power 520,000 homes with clean electricity for decades."
