

Arcturus Steel to buy 150 MW of Harrow Bay offshore wind power under 15-year PPA

Press release

Noah Fischer · 12 May 2026

Hamburg, 12 May 2026 – Weyland Energy GmbH and the green steel producer Arcturus Steel AG have signed a 15-year power purchase agreement (PPA) for 150 MW of capacity from the Harrow Bay Offshore Wind farm. Under the pay-as-produced agreement, Arcturus Steel will take around 590 GWh of renewable electricity per year from the start of commercial operation, planned for mid-2028.

The electricity will power Arcturus Steel's electric arc furnace and its planned hydrogen-based direct reduction plant, cutting the CO₂ footprint of its steel by more than two thirds compared with the blast furnace route.

“This agreement links two industries that need each other,” said **Dr. Amara Okafor, CEO of Weyland Energy**. “Our offshore wind makes green steel possible – and the green steel in tomorrow's turbines closes the circle.”

Weyland and Arcturus Steel are also working together on a 5 MW green hydrogen pilot at the Port of Eastholm, for which a feasibility study is under way.

The contract (reference WE-PPA-2026-004) is one of the largest corporate offshore wind PPAs signed in Northern Europe this year. Commercial terms were not disclosed.
