

Green hydrogen in 45 minutes

Lunch & Learn · Isabel Ferreira · 24 September 2026

What is green hydrogen?

- Hydrogen made by splitting water with renewable electricity
- PEM electrolyzers react quickly – a good match for wind
- Steel making can replace coal with hydrogen (direct reduction)

Our pilot

5 MW

PEM electrolyser at
Port of Eastholm

40 %

Arcturus Steel share in
Eastholm Hydrogen
GmbH

60 %

Weyland share

2026

feasibility study
completed (August)

Next steps

- EU Innovation Fund application in preparation
- Eastholm Hydrogen GmbH in formation (60 % Weyland, 40 % Arcturus)
- FEED study and water supply agreement

WEYLAND ENERGY

Thank you
