

Procurement Policy

Weyland Energy GmbH · version 4.0

Elena Márquez · 14 January 2026 · WE-PRC-POL-001

1. Purpose and scope

This policy sets the rules for buying goods, works and services at Weyland Energy GmbH and its project companies. It applies to all employees and all spend, from a box of safety gloves to a turbine supply agreement. Our aim is value for money over the whole life of an asset, fair competition, safe and ethical supply chains, and full traceability for our lenders, auditors and the public bodies that grant our consents.

2. Principles

- **Competition:** purchases above EUR 25,000 require at least three written quotations; above EUR 250,000 a formal tender.
- **Segregation of duties:** the person who requests a purchase does not approve it and does not receive the goods.
- **No purchase order, no payment:** invoices without a valid PO number are returned to the supplier.
- **Total cost of ownership:** we evaluate price together with quality, HSE performance, delivery risk and sustainability.
- **Conflicts of interest:** any personal relationship with a bidder must be declared before the tender is issued.

3. Thresholds and procedures

Value (EUR, excl. VAT)	Procedure	Approval
< 5,000	Direct purchase, one quote	Budget holder
5,000 – 25,000	One written quote, PO required	Budget holder + Procurement
25,000 – 250,000	Three written quotes	Head of department + Procurement Manager
250,000 – 2,000,000	Formal tender, evaluation matrix	Managing director level (see DoA matrix)
> 2,000,000	Formal tender, tender board	Executive Board; > EUR 20 m: Supervisory Board

4. Supplier qualification

Suppliers of critical and high-risk categories (turbines, foundations, cables, vessels, HV equipment, O&M services) must complete the Supplier Qualification Questionnaire and are audited before contract award. Certification to ISO 9001 is expected; ISO 14001 and ISO 45001 are required for work on our sites.

5. Sustainability and human rights

All suppliers must sign the Weyland Supplier Code of Conduct. We apply the UK Modern Slavery Act 2015 and the German Supply Chain Due Diligence Act (LkSG) to our supply chain and carry out a risk analysis for all direct suppliers every year. Steel, copper, polysilicon and battery materials are treated as high-risk commodities.

6. Contract management

Every contract above EUR 250,000 has a named contract owner who monitors performance, change orders and claims. Change orders are approved under the same thresholds as the original purchase. Supplier performance is scored quarterly for critical suppliers.

7. Roles

Role	Responsibility
Procurement Manager (Laura Kessler)	Owner of this policy, tender process, supplier register
Category buyers (e.g. Mateo Rossi, electrical)	Market analysis, RFQs, negotiations
Budget holders	Requisitions, goods receipt, invoice approval
Legal & Contracts (Priya Nair)	Contract terms, templates, disputes
Finance (Marcus Bell)	PO system, payment controls, DoA compliance

Policy owner: Laura Kessler, Procurement Manager. Approved by the Executive Board on 14 January 2026.
Next review: January 2027.
