

Go/No-Go Memo – Brenna Moor Wind

Decision: NO-GO

Sofie Lindqvist · 18 February 2026

Recommendation

No-go. Do not proceed with the 56 MW Brenna Moor onshore wind opportunity.

Reasons

- A golden eagle territory overlaps the northern half of the site; collision risk modelling indicates consent is very unlikely without removing 5 of 10 turbines.
- Peat depths of 3–5 m across 40 % of the developable area – carbon payback > 3 years.
- With 5 turbines the project falls below our 30 MW minimum for Scottish onshore wind.

Criterion	Score (1–5)	Comment
Wind resource	5	8.9 m/s at 120 m (modelled)
Grid	3	33 kV, 14 km
Ecology	1	Golden eagle, peat
Planning	2	Landscape designation adjacent
Land	4	Single estate

Sunk costs: EUR 46,000 (desk studies, bird survey season 1). Site data archived in the screening folder.
